

SPM-1100

SERIES

Remote Speaker Microphone

The SPM-1100 is a new, professional quality microphone that is both splash proof and modular. The modular nature makes replacing broken microphone cords easy to do in the field while the splash proof and high durability nature of the microphone makes the unit perfect for industrial and other high-duty environments.

These remote speaker microphones may be secured to the user's lapel, shoulder, or belt with an adjustable clip on the back of the unit that rotates up to 360°. It also features an accessory jack for connecting an earphone to the unit, allowing the user to operate with the convenience of a large, remote microphone and the privacy of a surveillance system.

Remote Earphone Accessory (Optional)
