## 2. Physical Introduction

### Front Panel Description

### Rear Panel Description

- 2 -

## 3. Hardware Installation

**Step 1:** Please turn on your projector first and connect HDMI or D-sub cable of the projector to the WIPG-300H. Now you can power on the WIPG-300H.

- 3 -

**Step 2:** When the projector shows the default screen as shown below, it indicates the WIPG-300H is ready now.

## 4. Software Installation – Windows

**Step 1:** The site surveys the wireless signal of the WIPG-300H, and connect your PC with it wirelessly.

\* The connection information (SSID) can be found on the projector screen.

- 4 -

Default SSID: **WIPG-300H** Default IP Address: **192.168.1.1**  
Default Username: **admin** Default Password: **admin**

**Step 2:** Open the web browser and it will redirect to the WIPG-300H home page automatically, or you can enter the default IP address **192.168.1.1** to access it.

**Step 3:** Download the client utility (**WIPG**) of Windows 7/8/10 and execute it. After installing the program, you'll see MirrorOp shortcut on your PC desktop.

You can download Utility for Windows from here.

[Download](#) ( Windows 7 / 8 / 10 )

**Note:**  
For Internet Explorer 8 and above, please disable the "SmartScreen Filter" first to download and install this software.

**Step 4:** Click **MirrorOp** icon  on the desktop to execute the program. The utility will start to search the available access points automatically if you have not connected your PC to the WIPG-300H manually.

**Note** Please make sure the firewall in Windows will allow the software to pass through.

**Step 5:** When the default SSID "WIPG-300H" is displayed in the list, please click it to connect and then enter the Login Code shown on the projector screen.

**Step 6:** Click the  button to start projection, or choose one of the numbers (1-4) to project to the split screen.
